

Future Engagement between NGS and Industry

2021 NGS Industry Workshop
May 6th, 2021

Galen Scott, NGS Constituent Resources Manager

Introduction

Collaboration between NGS and industry will be necessary to ensure our respective stakeholders and customers can seamlessly transition to and begin to reap the benefits of the modernized NSRS.

Goal is to leave with a plan to continue engagement over the coming years.

Proposed Topics for Future Engagement

- Developing and implementing new standardized File formats
 - GVX, LVX, CVX, RGX
- How NGS can best support Real-Time positioning network operators and users
- Implementing updates to NGS models and tools within commercial software
- Building links to the NGS Data Delivery System to enable ingest of NGS data into commercial software
- Encouraging users to submit data to NGS to best realize the Modernized NSRS and track changes over time

Proposed Engagement Methods

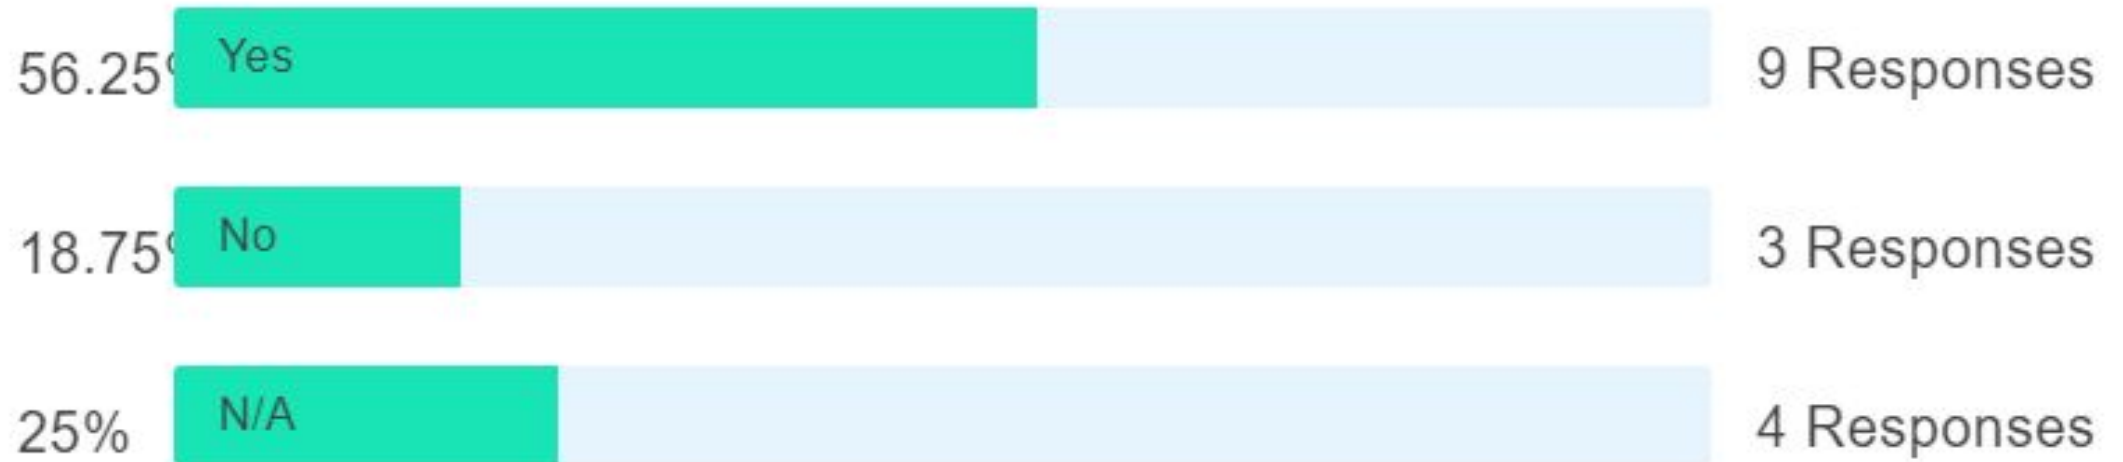

- Working through existing structures and organizations, such as Open Geospatial Consortium (OGC)
- Feedback webinars during product development cycle, as was done for GVX
- Presentations from industry partners to NGS staff
- Quarterly progress reporting and discussion meetings with NGS product development staff

Questions

- Do you currently use OGC standards?
- Would you be interested and willing to participate in quarterly progress check and discussions with NGS?
- Would you be interested in participating in feedback webinars with our product development teams?

3 of 5. Do you currently use OGC standards?

Multiple choice with single answer

4 of 5. How often would you like to meet with NGS over the next few years until the Modernized NSRS is released?

Multiple choice with single answer

5 of 5. What Social Media do you use to engage your customers?

Multiple choice with multiple answers
