2459 2470

Descriptive Report

Additional Work on Topographic sheets

Numbers 2456-2457-2458-2459-2470

June and July 1915

The additional work on the above numbered topographic sheets is indicated in red, and consists of the determination of "natural and artificial objects" for use in the proposed inshore and off shore hydrographic surveys, off the coast of New Jersey, from Tuckers Beach to Belmar.

In addition to the determining of objects, the shore line at inlet inlets, and points at various places was redetermined.

Streets and roads were also determined where no additional time to do so was necessary. If the true alignment of the road built by the New Jersey Highway Board can be obtained, this road can be plotted from the points shown in it on the sheets.

Attached hereto is a list of objects determined, with their elevation above mean high water. For additional points (small ¹poes marked with strips of signal cotton) see the topographic sheets.

E. B. Sacham

Chief of Party U.S. Coast and Geod. Survey

June 15, 1914

To the Superintendent,

Coast and Geodetic Survey,

Washington, D. C.

Sir:-

I have the honor to forward topographic Sheets Nos.
✓ 2470 and 2472, which were sent me to identify the
Life Saving Stations at Long Branch, Deal Lake, Shark
River and Spring Lake.

I have completed this work and the stations have
been marked in pencil. Other changes in the localities
were noted in pencil.

This work was executed in accordance with instructions
of June 9, 1914.

Respectfully yours,

Paul Whitney
Commanding.

Examination of Topographic Sheets

Revision Survey.

by the

Divisions of Field Work and Field Records.

1. Has the magnetic meridian been determined? *No*
2. Is the point occupied for the determination of magnetic meridian designated?
3. Is the approximate or rodded location of high water mark in back of mangroves shown?
4. Have navigable rivers been surveyed?
5. Is interior information given by descriptive legends or otherwise?
6. Is the inking of the sheet legible? *No*
7. Is projection properly shown?
8. Are methods of surveying fully described? *No*
9. Are descriptive legends given concerning conspicuous islets, objects, rocks, and other features given in blank areas?
10. Are geographic names given?
11. Is full information regarding geographic names given in the descriptive report in accordance with paragraph 557 of the Instructions for Field Work?
12. Are the names of topographic signals given?
13. Does the sheet have a neat appearance? *No*
14. Is sufficient contouring shown, some of which could be obtained by sextant directions from boat positions?

15. Is the control good? *No. mention of control for determination of objects.*
16. Is the sheet well laid out?
17. Is the accuracy of traverses between triangulation stations stated in the descriptive report? *No.*
18. Are the elevations of prominent rocks or islets given?
19. Are the description of reefs, as bare, awash or covered at high or low water given?
20. Are objects useful for future surveys indicated? *Yes - object of survey*
21. Is there a record of marking topographic stations?
22. Is the character of the beach shown in various places?
23. Is the plane of reference for elevations given?
24. Is the low water line determined at important places?
25. Is there a full list of data affecting sheet given on title sheet?
26. Is there a list of plane table positions? *Yes*
27. Are the elevations whether that of tree-top or ground indicated?
28. Does the descriptive report give date of instructions? *No*
29. Is a sketch given showing contouring of interior mountainous country beyond limits of sheet?
30. Is the general description of the coast given?
31. Is there information about obtaining fresh water?
32. Have standard symbols for various features been used?

33. Is the survey complete?
-
34. Is there a note as to cultivations, roads and other improvements?
-
35. Is commercial information given in descriptive report?
36. Is there a list of landmarks? *No. —*

Remarks

*The red ink used to show revision work
was not applied properly ^{by smoothing surface of paper} causing it
to run.*

Revision Survey
Examination of Topographic Sheets

by the

Divisions of Field Work and Field Records.

1. Has the magnetic meridian been determined? *No*
2. Is the point occupied for the determination of magnetic meridian designated?
3. Is the approximate or rodded location of high water mark in back of mangroves shown?
4. Have navigable rivers been surveyed?
5. Is interior information given by descriptive legends or otherwise?
6. Is the inking of the sheet legible? *No*
7. Is projection properly shown?
8. Are methods of surveying fully described? *No*
9. Are descriptive legends given concerning conspicuous islets, objects, rocks, and other features given in blank areas?
10. Are geographic names given?
11. Is full information regarding geographic names given in the descriptive report in accordance with paragraph 557 of the Instructions for Field Work?
12. Are the names of topographic signals given?
13. Does the sheet have a neat appearance? *No*
14. Is sufficient contouring shown, some of which could be obtained by sextant directions from boat positions?

2457

- 2 -

15. Is the control good? *Not mentioned in S. R.*
16. Is the sheet well laid out?
17. Is the accuracy of traverses between triangulation stations stated
in the descriptive report? *No*
18. Are the elevations of prominent rocks or islets given?
19. Are the description of reefs, as bare, awash or covered at high or
low water given?
20. Are objects useful for future surveys indicated? *Yes - object of survey*
21. Is there a record of marking topographic stations?
22. Is the character of the beach shown in various places?
23. Is the plane of reference for elevations given?
24. Is the low water line determined at important places?
25. Is there a full list of data affecting sheet given on title sheet?
.....
26. Is there a list of plane table positions? *Yes*
27. Are the elevations whether that of tree-top or ground indicated? .
.....
28. Does the descriptive report give date of instructions? *No*
29. Is a sketch given showing contouring of interior mountainous country
beyond limits of sheet?
30. Is the general description of the coast given?
31. Is there information about obtaining fresh water?
32. Have standard symbols for various features been used?

2453

33. Is the survey complete?
.....
34. Is there a note as to cultivations, roads and other improvements?
.....
35. Is commercial information given in descriptive report?
36. Is there a list of landmarks? *no*
