SUMMARY TO ACCOMPANY
DESCRIPTIVE REPORT T-11898

Shoreline survey T-11898 compiled at 1:10,000 scale covers a part of the shoreline of Maui Island from the vicinity of Waihee Reef northwestward to Mahinanui. This is one of forty-nine similar maps in this project. The maps were compiled primarily to provide new shoreline for nautical charts and to furnish photo-hydro support data for hydrographic surveys in the area.

Field work preceding compilation included recovery and identification of horizontal control and field inspection. No photo-hydro stations were preselected.

Compilation was by Kelsh Plotter method using control established by aerotriangulation and the 1:25,000 scale panchromatic photography obtained on the 9th and 10th of October 1960. A cronaflex copy of the manuscript was furnished for preparation of the boat sheet and for the location of hydrographic signals by photogrammetric methods.

The manuscript is a vinylite sheet from which the smooth sheet was drafted and reproduced. One cronar positive and one cronar negative are provided for record and registry.

REVIEW REPORT T-11898
SHORELINE
April 19, 1966

61. GENERAL STATEMENT

See summary accompanying Descriptive Report.

62. COMPARISON WITH REGISTERED TOPOGRAPHIC SURVEYS

Comparison was made with a copy of Registered Planetable Survey No. 3270, 1:20,000 scale, made in 1911-1912 and approved March 30, 1914. The two surveys are in fairly good agreement considering the difference in scales and the date of the plantable survey.

Map manuscript ^{T-11898} supersedes the Planetable survey and should be used for future nautical chart construction.

63. COMPARISON WITH MAPS OF OTHER AGENCIES

Comparison was made with U.S.G.S. quadrangles Kahakuloa and Wailuku, 1:24,000 scales and each editions of 1955.

The two maps are in good agreement although the shoreline of the U.S.G.S. quadrangle has been somewhat generalized because of the scale.

64. COMPARISON WITH CONTEMPORARY HYDROGRAPHIC SURVEYS

Comparison was made with a copy of boat sheet H-8579 (SU-10-4-61). A rock shown on the boat sheet at latitude 20° 59' 12" longitude 156° 32' 08" is not visible on photography of the area. ^{42"} *

The shoreline of the boat sheet is not in agreement with the final reviewed manuscript. Shoreline changes were made during final review on Mokeehai Island and in the area northwest of Makawana Point. Other discrepancies between the boat sheet and manuscript have been noted on the Comparison Print.

* NOTES TO VERIFIER
PAGE 17

65. COMPARISON WITH NAUTICAL CHARTS

Comparison was made with Chart 4124, 1:30,000 scale, 3rd edition, May 3, 1965. The following items were noted.

✓ Small island on chart at latitude $20^{\circ} 59' 04''$ longitude $156^{\circ} 31' 42''$ is actually a peninsula.

✓ Three rocks at latitude $20^{\circ} 58' 47''$ longitude $156^{\circ} 31' 36''$ are not visible on photographs of the area.

✓ Submerged rock at latitude $20^{\circ} 57' 27''$ longitude $156^{\circ} 30' 57''$ is not visible on photographs.

✓ Rock mentioned in item 64 is not visible on photographs.

66. ADEQUACY OF RESULTS AND FUTURE SURVEYS

This surveys complies with project instruction and meets the National Standards of Map Accuracy.

NOTES TO REVIEWER
H-85793
(Comparison with T-11898)

With one exception, shoreline information furnished by means of Incomplete Manuscript T-11898 was accepted for the hydrographic survey. The field editor found error in the Mokeehai Island MHW line. This was corrected on the boat sheet by the hydrographer using photo 60-W-2494 as recommended by the field editor. The shoreline was corrected on T-11898 during application of field edit data. Differences between the surveys exist in representation of the subject MHW line - use of the T-11898 shoreline is recommended.

Other differences exist between the shoreline and hydrographic surveys as the result of changes made during final review - MHW corrections, rocks and ledge added. Differences are noted on the Comparison Print.

The following significant discrepancy was noted. Two reefs located immediately south of Makawana Pt. (T-11898) are not accounted for on the hydro survey. The area was surveyed by the hydro party. The reefs are visible on photography.
