### SUMMARY TO ACCOMPANY

### DESCRIPTIVE REPORT

T-11940

Shoreline survey T-11940 is part of project PH-6306. The project is located in southeastern Alaska in the Hoonah Sound-Peril Strait area. This survey covers part of the Peril Strait area and the entrances to Rodman Bay and Appleton Cove.

There was no field work preceding the "Incomplete" manuscript.

Compilation was at 1:20,000 scale using the B-8 plotter to drop control for resecting the raticed photography. The delineation of detail was by graphic method. This survey includes most of T-13325 compiled at 1:10,000 and reduced in size to be included on this manuscript. A copy of the manuscript classified "Incomplete"

### FIELD INSPECTION

## T-11940

There was no field inspection prior to compilation.

# Photogrammetric Plot Report (Part II) Job PH-6306 Hoonah Sound and Peril Strait, Alaska

November 1969

### 21. Area Covered

This report covers Hoonah Sound, Alaska, by the following eight (8) 1:10,000 scale shoreline T-sheets: T-13324 thru T-13331; three (3) 1:20,000 scale shoreline T-sheets: T-11940 thru T-11942 and by one (1) 1:40,000 scale sheet for chart topography T-11939 with 1:20,000 scale inset. (See Report Part I, October 1968 for strips previously bridged and sheets covered).

### 22. Method

Ten (10) strips were bridged using analytical aerotriangulation methods. Strips 1, 2, 3, 10, 11 and 13 are 1:60,000 scale panchromatic and strips 8, 9, 12 and 14 are 1:30,000 scale color.

Numerous tie points were located to control several of the strips due to the sparseness of horizontal control.

<u>'</u>		
7		
<b>-</b>		
g ( <del>s.</del>		
<b>A</b> . ,	<u> </u>	
<u> </u>		
_		
,		
t ii		

### 24. Supplemental Data

Vertical control needed for the adjustment was taken from USGS quadrangles.

### 25. Photography

The definition and quality of the RC-9 "M" panchromatic and RC-8 "L" color photography were good. Coverage is adequate to compile all sheets by either the 1:60,000 or 1:30,000 scale photography.

Respectfully submitted,

I. I. Saperstein

Approved) and forwarded,

Henry P. Eichert

Chief, Aerotriangulation

Section

### Notes to Compiler

In order to compile the 1:10,000 scale sheets in Peril Strait, Rodman Bay and Saook Bay, it may be necessary to do so from the 1:30,000 scale photography. If so, order 1:30,000 color plates and contact photographs where necessary to locate compilation points from the 1:60,000 scale bridging photography. (See photo layout for plates required). All ratio prints should be ordered by the compilation office.

Bridge points will be plotted in Rockville by the Coradi on all sheets except T-11939.

T-11940

### 31. DELINEATION

The Wild B-8 Plotter was used to establish substitute control to use for resecting the ratioed photographs. Delineation of the detail was by graphic method. Photography was adequate. There was no field inspection.

### 32. CONTROL

See photogrammetric plot report.

### 33. SUPPLEMENTAL DATA

None

### 34. CONTOURS AND DRAINAGE

Contours are inapplicable. Drainage was delineated from office interpretation of the photographs.

### 35. SHORELINE AND ALONGSHORE DETAILS

The shoreline, low-water line and the intermediate area between the two stages were delineated from office interpretation of photographs taken near lower low-water.

### 36. OFFSHORE DETAILS

No statement.

### 37. LANDMARKS AND AIDS

Form 567 for one nonfloating aid was submitteddto Rockville Office on September 16, 1970.

### 38. CONTROL FOR FUTURE SURVEYS

None

### 39. JUNCTIONS

Junctions are in agreement with T-13326, T-13124, and T-13190; scale 1:10,000, to the west. There is no contemporary survey from Latitude 57°29'45" to 57°31'15" on the west. T-11941 to the east, scale 1:20,000, is in agreement from latitude 57°28'00" to 57°31'00". There is no contemporary survey north of latitude 57°31'00". The junction to T-13327, 1:10,000 scale to the south is in agreement. T-13325, 1:10,000 scale lies within the limits of this manuscript with the exception of 15" which lies to the south. There is no contemporary survey to the north.

### 40. HORIZONTAL AND VERTICAL ACCURACY

No statement.

### 41. FIELD EDIT

No form 567 received in this office.

### 46. COMPARISON WITH EXISTING MAPS

Comparisons were made with USGS Quadrangles, Sitka (B-4), and (C-4), scale 1:63,360, dated 1951.

### FIELD EDIT REPORT

### MAP T-11940

### Peril Strait

Field edit of map T-11940 was accomplished during May, 1970. Inspection was done from a launch before and after the hydrography.

### METHOD

Field photographs and a copy of the Field Edit Ozalid were examined in the field. The mean high water line was verified by visual comparison of the shore area to field photographs and ozalid. Notes on the heights of rocks, location of the MHWL, and other data pertaining to photo identifiable features have been made in violet on the Field Edit Ozalid and cross referenced where necessary, to field matte ratio prints. Unless otherwise indicated all shoreline features have been verified correct as interpreted. All notes are in violet ink on the following 1:20,000 field photos: 67L3217, 67L3214, 67L3215, and 67L3218. All times are based on meridian 105° W.

### ADEQUACY OF COMPILATION

Compilation of the map is good. Hydrographic location of features compares well to photogrammetric location. Corrections and additional identifiable features have been indicated on the field edit ozalid and photographs.

Field inspection of the map is complete.

### RECOMMENDATIONS

It is recommended that the map be revised in accordance with Field Edit data provided and be accepted as an advance manuscript.

Respectfully submitted,

William D. nell

### REVIEW REPORT T-11940

### SHORELINE

### July, 1973

### 61. GENERAL STATEMENT

See summary which is page 6 of the Descriptive Report.

### 62. COMPARISON WITH REGISTERED SURVEYS

There is no registered survey in this area.

### 63. COMPARISON WITH MAPS OF OTHER AGENCIES

Comparison was made with U.S.G.S. Quadrangles Sitka (B-4), Alaska and Sitka (C-4), Alaska, 1:63,360 scale dated 1951. Except for minor natural changes there is good agreement.

### 64. COMPARISON WITH CONTEMPORARY HYDROGRAPHIC SURVEYS

Comparisons were made with Boat Sheets H-9125 and 9126 at 1:10,000 scale dated 1970. These were in good agreement. No other boat sheets were available at this time to make a complete comparison of the remainder of this survey. The photogrammetric MILWL is compiled from photos taken at 0.5 ft. above MILW (predicted).

### 65. COMPARISON WITH NAUTICAL CHARTS

Comparison was made with Chart 8283, 1:40,000 scale dated July 17, 1971. There is good general agreement.

### 66. ADEQUACY OF RESULTS AND FUTURE SURVEYS

This survey meets with project instructions and the National Standards of Map Accuracy.
