SUMMARY TO ACCOMPANY
DESCRIPTIVE REPORT T-11989

Shoreline manuscript T-11989 is one of forty-nine similar maps in this project and covers a part of the coastline of Maui Island. This was a Kelsh project in advance of hydrographic surveys in the area. The field operations preceding compilation included recovery and identification of horizontal control and field inspection. The Kelsh compilation was at 1:5,000 scale from 1:25,000 scale photography obtained in October 1960. A cronaflex positive showing shoreline, alongshore features and shoreline pass points was furnished for the preparation of the hydrographer's boat sheet along with 1:5,000 scale ratio prints for the location of hydro signals and for field edit purposes.

The compilation manuscript is a vinylite sheet 1 minute 55 seconds in latitude by 2 minutes 50 seconds in longitude from which the smooth sheet was drafted and reproduced on cronaflex. One cronar positive and one cronar negative are provided for record and registry.

FIELD INSPECTION REPORT
T-11989

Please refer to the Field Inspection Report for Maui Island,
Hawaii bound with the Descriptive Report for T-11991.

COMPILATION REPORT T-11989

For additional data pertaining to this survey please refer to the Field Inspection Report for Maui Island bound with T-11991 and the Photogrammetric Plot Report bound with T-11907.

ITEMS 31 THRU 36

Please refer to the Compilation Report bound with T-11896.

37. LANDMARKS AND AIDS

There are no landmarks, fixed aids to navigation or aeronautical aids within the compilation limits of this survey.

38. CONTROL FOR FUTURE SURVEYS

No control for future surveys was located during compilation.

39. JUNCTIONS

Satisfactory junctions were made with T-11911 on the north and with T-11990 on the south. There is no contemporary survey on the west; the Pacific Ocean is on the east.

46. COMPARISON WITH EXISTING MAPS

Comparison was made with U.S.G.S. Hana, Hawaii quadrangle, 1:24,000 scale, edition of 1957.

47. COMPARISON WITH NAUTICAL CHARTS

Comparison was made with nautical chart 4116, 1:250,000 scale, 12th edition, August 17, 1964.

ITEMS TO BE APPLIED TO NAUTICAL CHARTS IMMEDIATELY

None

ITEMS TO BE CARRIED FORWARD

None

49. NOTES FOR THE HYDROGRAPHER

A set of ratio photographs (taken in 1962) has been prepared for use during photo-hydro support.

Color photography was used as an aid in interpreting offshore details and foul lines.

The positions of the following hydrographic signal sites, identified on field inspection photographs, have been established photogrammetrically for the following surveys:

<u>Signal No.</u>	<u>Description</u>	<u>Photo. No.</u>
T-11989		
8901	Rag on palm	2377
8902	Rag on lauhala tree	2377
8903	Rag on small kamane tree	2377
8904	Rag on bush, W. side of path	2377
8905	Rag on iron wood tree	2377
8906	Rag on lone lauhala tree	2377
T-11990		
9001	West gable, aluminum roof cottage	2378
9002	Flag, S. E. corner of rock pile	2378
9003	S. E. Corner GAY house	2378
9004	Center of round rock	2377
3904	West gable, small brown, green roof house	2380

FIELD EDIT REPORT
T-11989

No formal Field Edit Report was received.

Other maps in the project were field
edited in 1963

No FIELD EDIT SHEET WAS SUBMITTED

14.

REVIEW REPORT T-11989
SHORELINE

61. GENERAL STATEMENT

See summary accompanying Descriptive Report.

62. COMPARISON WITH REGISTERED TOPOGRAPHIC SURVEYS

A visual comparison was made with Registered Planetable survey No. 3274, 1:20,000 scale dated March 30, 1914.

Shoreline manuscript T-11989 supersedes the planetable survey and should be used for nautical chart construction.

63. COMPARISON WITH MAPS OF OTHER AGENCIES

Comparison was made with U.S.G.S. Hana, Hawaii quadrangle, 1:24,000 scale, edition of 1957.

64. COMPARISON WITH CONTEMPORARY HYDROGRAPHIC SURVEYS

* Comparison was made with a copy of boat sheet H-8719-PF-10-2-63 sheet CC. The differences in the high water line of the boat sheet and manuscript are shown on the Comparison Print.

65. COMPARISON WITH NAUTICAL CHARTS

Comparison was made with nautical chart 4116, 1:250,000 scale, August 17, 1964.

66. ADEQUACY OF RESULTS AND FUTURE SURVEYS

This survey complies with instructions and meets the National Standards of Map Accuracy.

x Note: A "Notes to Verifier" page was submitted to the Hydro Branch, 8/2/66. Refer to page 16 of this report.

NOTES TO VERIFIER
H-8719
PH-6012 (T-11989)
Maui Island, Hawaii

Survey

Project H-8719 (PF 10-2-63) was compared with T-11989 during final review of the shoreline survey. Local datum differences (up ⁴4.0 mm as measured on the manuscript) exist between the surveys in shoreline and alongshore rocks. Boat sheet shoreline has been traced, by the final reviewer, on the Comparison Print for T-11989.

The Descriptive Report for T-11989 contains no information indicating that changes of the magnitude described in the preceding paragraph were applied to the shoreline survey subsequent to furnishing a copy of the preliminary map for use in hydro support. *application of field e*

Application of field edit changes is accounted for in the Photogrammetric Office Review Report; however, no formal field edit report was submitted.

*J. H. Blankenhorn
